
Steep Angles Deep Dives Edward

behaviour and buoyancy regulation in the deepest-diving ... - a consistent behavioural pattern within dives among individuals, with an initial period of active swimming at relatively steep descent angles (~-40 deg), with a stroke frequency of 0.32 hz, followed by a gliding phase. the depth at which the gliding phase began increased with the maximum depth of the dives. **the fountains of the great deep - creationicc** - the fountains of the great deep dr. walter t. brown, jr. (director, center for scientific creation 5612 n. 20th place phoenix, arizona 85016 abstract there are many new reasons for concluding that the earth has experienced a devastating, worldwide flood—a flood whose waters burst forth with extreme violence from beneath the crust of the earth. **why do macaroni penguins choose shallow body angles that ...** - bottom exhibited steep body angles during ascent and subsequent descent. by contrast, they adopted shallow body angles after they had short or no bottom phases. our results suggest that macaroni penguins stay at the bottom longer after encountering a good prey patch and then travel to the surface at steep body angles. if they do not **classification of weddell seal dives based on three ...** - type 1 dives were inter-mediate in duration (15.0 ± 4.2 min), deep (mean maximum depth = 378 ± 93 m) and had the steepest descent and ascent angles. video recordings of the seals capturing prey, primarily small antarctic silverfish *pleuragramma antarcticum*, confirmed these were foraging dives. types 2, 3 and 4 dives **#530 hot lips express - outdoors** - with two separate stages angled to produce steep dive angles, greatly reduced cranking resistance and lure body vibration that previously ... our deep divers are mentioned, the actual diving angle of the lure is rarely a subject. because many so-called deep divers only reach ... dives the top of this 15-ft. hump with a steep dive angle on a ... **age-class variation in foraging techniques by brown pelicans** - age-class variation in foraging techniques by brown pelicans robert a. carla department of zoology university of oklahoma, norman, ok 73019 ... portant when birds are hunting prey that are relatively deep in the water. pelicans appeared ... and juveniles more often made “steep” dives with angles closer to vertical than did first- year birds ... **pitching a new angle on elephant seal dive patterns** - pitching a new angle on elephant seal dive patterns ... steep dive and return-to-surface angles in all ... dives are unusual in that the animals appear to be taking **synlithification deformation processes of the cretaceous ...** - low angles with respect to bedding, which are continuous ... involve dredging along the steep western slope of the icgmr [blare:z et al., 1987]. seismic reflection lines [basile, 1990; basile et al., 1993] and deep dives along the steep slope of the margin document highly deformed cretaceous sediments [mascle et al., 1993, 1996, 1997b; ... **mauna loa’s submarine western flank: landsliding, deep ...** - summit, beyond which it angles toward the south, finally terminating offshore (figure 1). [7] the morphology of the eastern and western flanks differ (figure 1). the subaerial eastern flank is deeply eroded, particularly to the southeast, where the steep-faced ninole hills break the slope. in contrast, the subaerial western flank is largely **exhibition development and implementation: five case studies** - “angles and dangles” is a submariners’ term for a critical exercise that usually takes place right after a nuclear submarine leaves on a patrol. once in deep water, the sub dives deep and then comes back up, both at a steep angle. anything that is not properly secured will fall down, making some noise. these are known as **analysis of potential deep coral habitats within submarine ...** - steep slopes, and depths up to 3000m make ideal habitats for deep-sea corals (roberts et al., 2006). carbonate mounds have also been found to create suitable habitats for deep-sea corals. slopes of the inter-canyon ridges were all found to be relatively steep, with most slopes averaging greater than 10°. **volcanoes and other igneous features** - • steep-sided cones produced by felsic magmas - convex sides, shallow slope angles at base, steepening sides towards top • eruptions are explosive with little to no lava - pyroclastic flow • volcanic ash, gas, tephra and volcanic bombs • lahars **rapid mass wasting following nearshore submarine volcanism ...** - rapid mass wasting following nearshore submarine volcanism on kilauea volcano, hawaii francis j. sansone a,*, john r. smith b a department of oceanography, university of hawai’i at ma’noa, 1000 pope road, honolulu, hawai’i 96822, u.s.a. b hawai’i undersea research laboratory, university of hawai’i at ma’noa, 1000 pope road, honolulu, hawai’i 96822, u.s.a.
